Shelf Divider for Tegometal Shelves

# Company Overview

---

## Injection Moulding

---

With injection moulding, dividers can be mass produced and used straight away.  
The moulding material is injected into the tool by an injection moulding machine.  
The hollow in the tool defines the shape and surface structure of the finished divider.  
It is possible to manufacture products from only a fraction of a gram up to several kilograms in weight.  
From our many years of experience, we have lots of tools available.

## Extrusion

---

At present we hold over 250 different types of scanner profile in stock. Make the most of our experience.  
Our profiles can make your profile stand out at the point of sale.

### Materials:

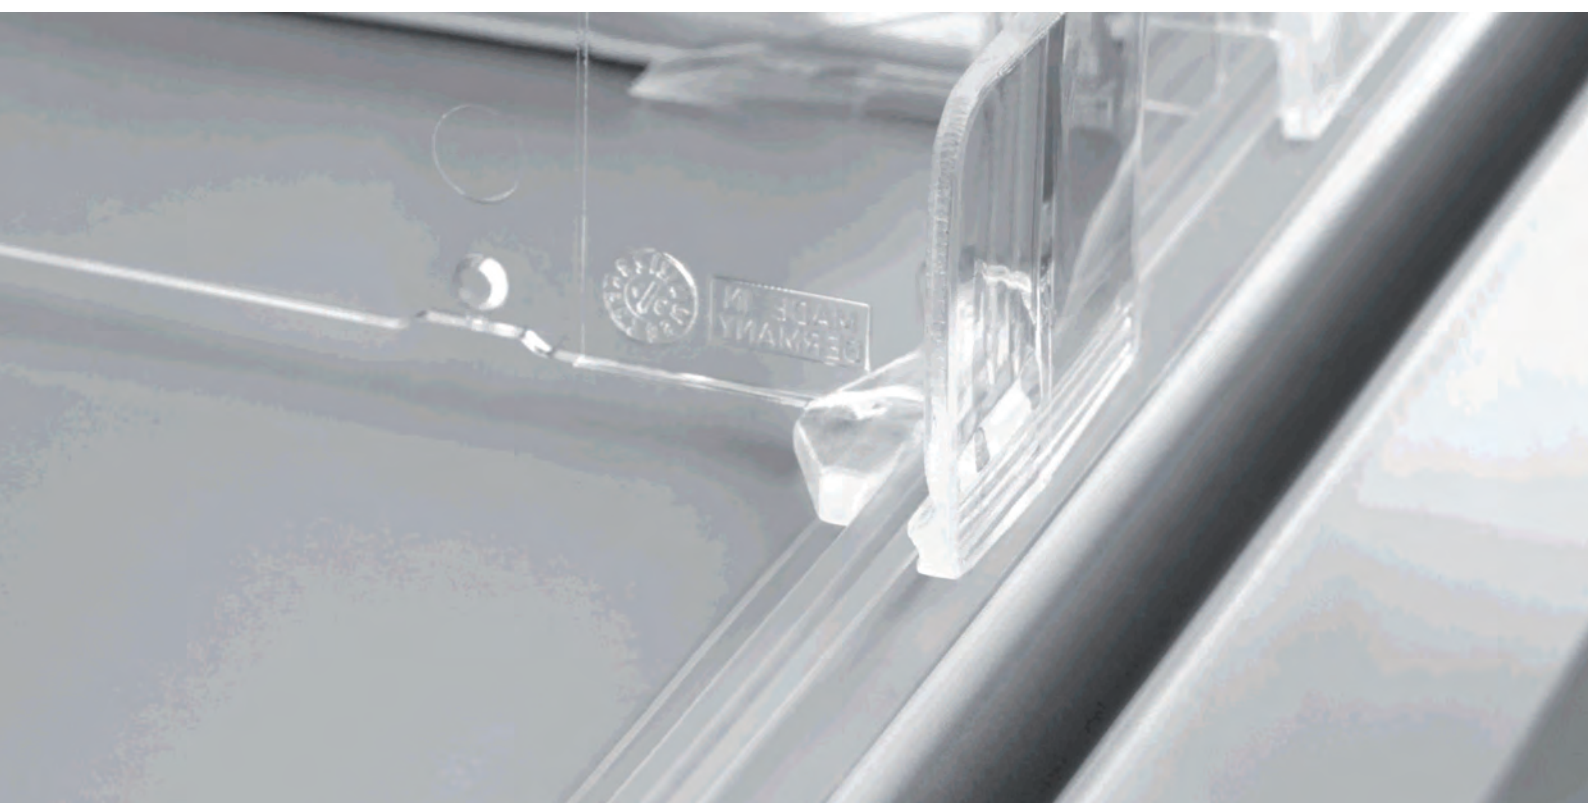

- PVC
- PET
- Polycarbonat (PC)
- TPE
- PLA
- Wood
- Fibreglass

### Processes:

- Mono-extrusion
- Co-extrusion
- Tri-extrusion
- Quad-extrusion

## 6 Fixing Rails for Front Fixing without Pricing
