information

All Advantages at a Glance

Compliance
of sales order
at
100 %

First In, First Out

The FIFO principle can be implemented consistently and the product rotation can be adhered to.

Time savings
for shelf main-
tenance up to
65 %

Reduced Labour Costs

The innovative rotating principle simplifies shelf maintenance and and minimises the time required.

**Return On
Investment**

The Results Count

Amortisation of the shelves
within a short time -
Tested and confirmed
by EDEKA techstarter.

Increase
in sales
by up to
20 %

Increased Sales

Due to the inclined position of the shelves, the goods automatically slide to the front, creating a high merchandise density. The system allows more shelves to be used so the number of facings can be increased. Both promote sales.

Reduction of
your mark-
downs by up to
40 %

Reduces the Disposal of Expired Goods

By filling from the back of the shelf, the products with shorter best-before dates automatically move to the front.

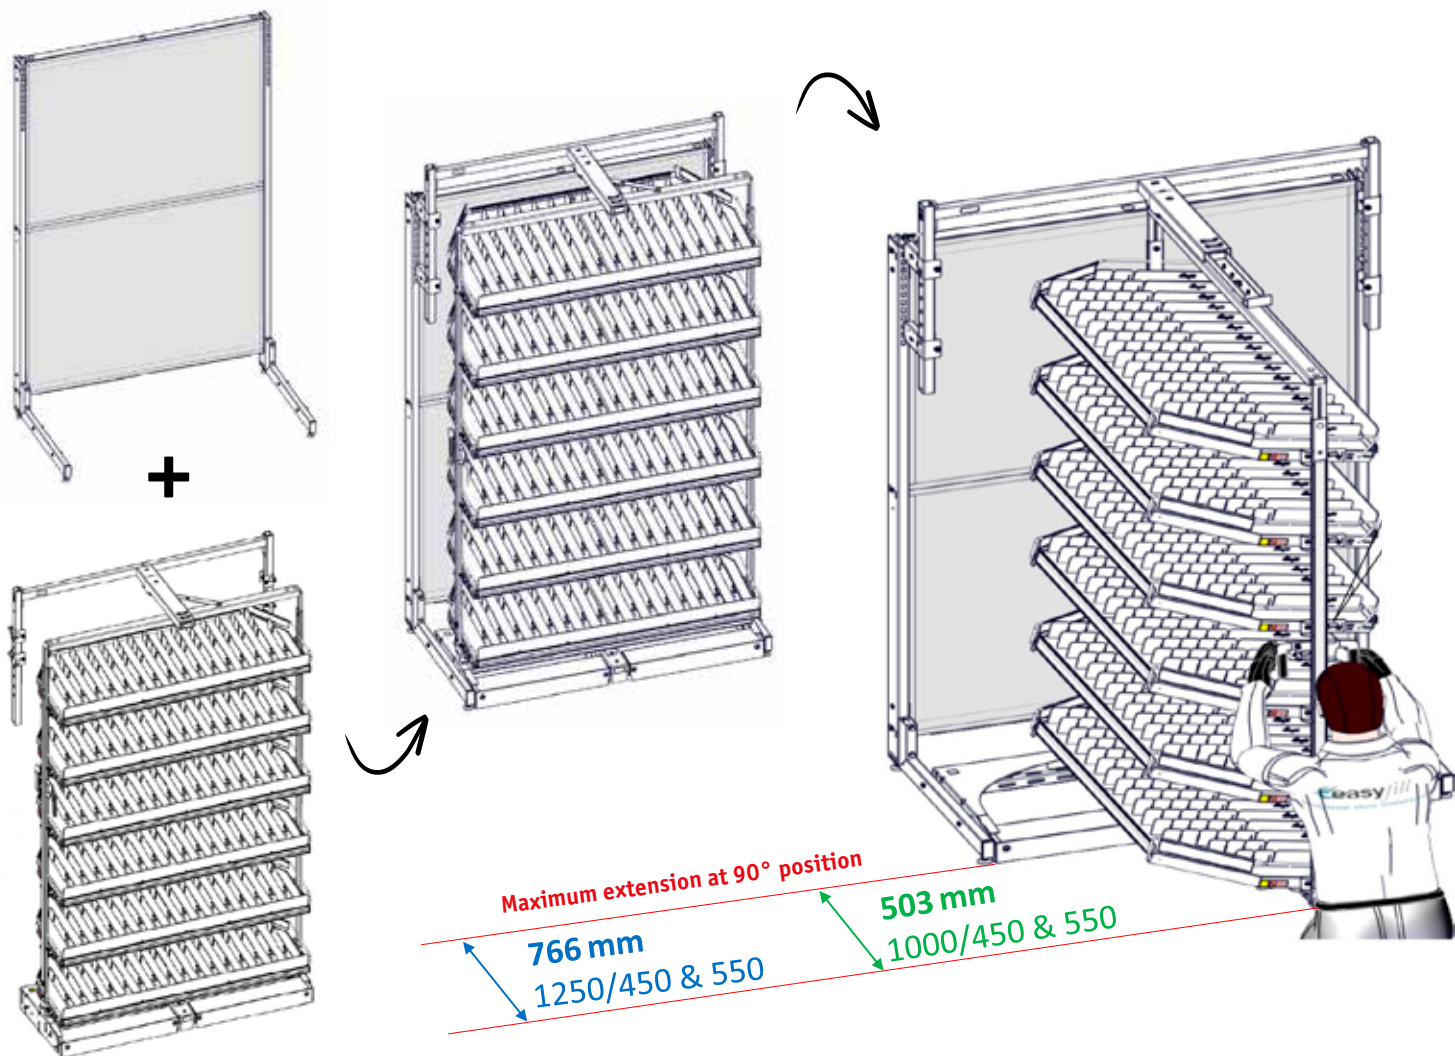

Before

After

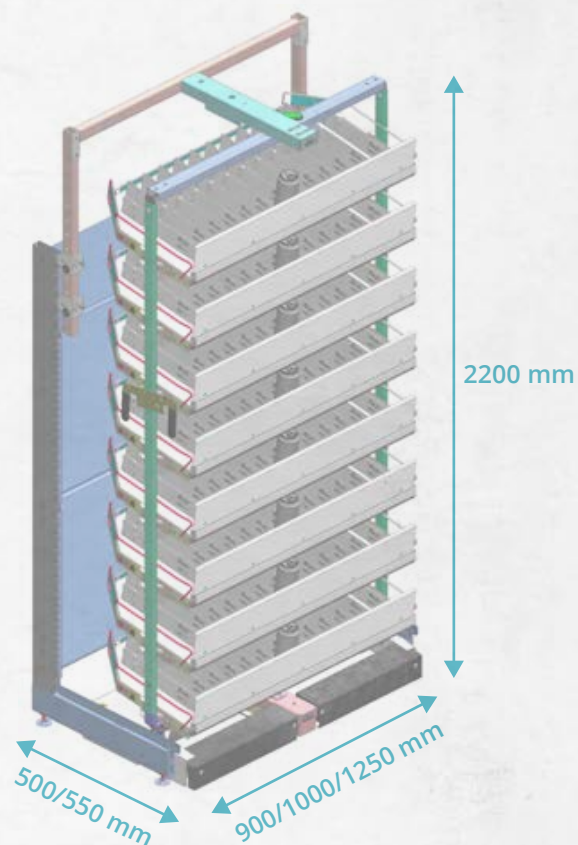

Adapt the Shelves Flexibly to Your Products

- available as a complete easyfill system
- also available for retrofitting in existing dry goods shelving systems such as StoreBest, Umdasch, Wanzl and Tegometall (min. shelf height 1600mm)
- flexible and freely adjustable shelves and frame heights
- due to the inclined position of the shelves, the goods automatically slide to the front of the shelves
- adjustable dividers
- front stopper in different heights

Flexible Setting Options

Customise the shelves taking the product height into account, in order to maximise product presentation and product density.

Feedback from your Colleagues

Edeka Retailer Oertwig

"Sales are increasing because order is maintained and the goods are presented more attractively."

Edeka Retailer Fausten

"Since we have gotten the shelving system, we have had to dispose of considerably less goods."

Edeka Retailer Struve

"The feedback from employees and customers is very positive. For the customers, it is primarily optics, for the employees a huge reduction in workload."
