51.0298.1

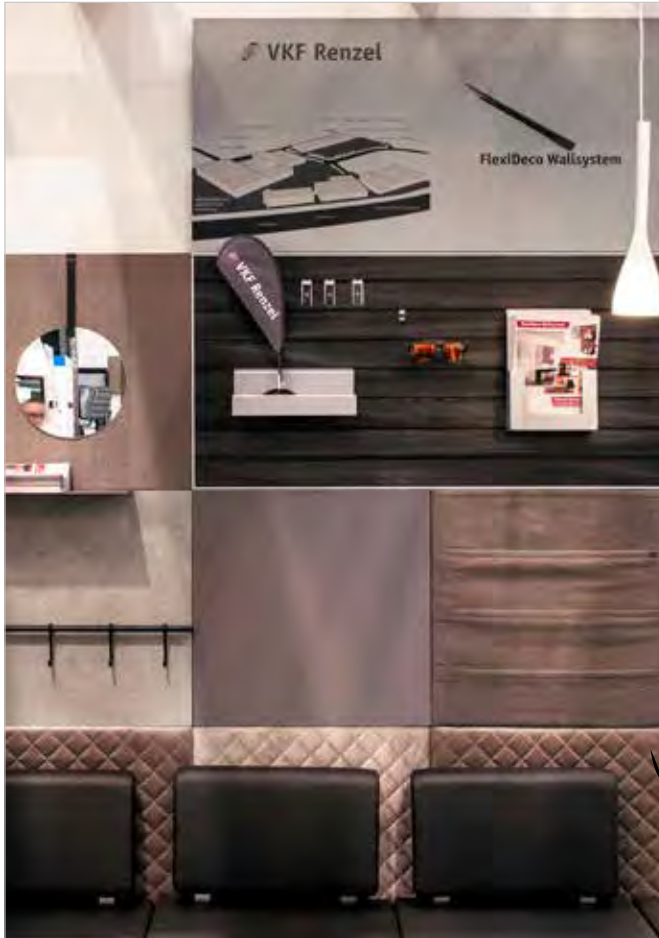

Due to the simple suspension system, assembly, exchange and extension are possible without any problems. Three basic elements make up the "FlexiDeco" wall panels:

- The basic panel **FlexiDeco Frame** forms the basis for the various combinations. The black plastic element is securely screwed to the wall. With the enclosed connecting piece, additional panels can be added as required.
- The decorative **FlexiDeco Stylepad** panels create the design of the wall area. They are hooked into the basic panels by means of an integrated support plate. Stylepads can be ordered in different surfaces and colours. In addition, we provide selected elements with a custom print on request.
- The FlexiDeco Functionals offer even more possibilities in the design of creative wall solutions. In combination with the Stylepads, shelves, hanging hooks or decorative clocks, for example are highlighted.
